

Math Resources For Parents

There are lots of great resources online to learn about improving math skills, and especially many great websites. Many kids willingly spend hours playing fun math video games and apps or engaging in math projects, but are reluctant to spend more than a few minutes with a math workbook. So, learn about some of the best ways to teach math and encourage your child to use mathematical thinking skills. We have put together a selection of some of the best pages on the Internet, with lots of information on learning about how to improve children's math skills. Check out the links below, which are updated regularly by our team at South County Child and Family Consultants.
