

Videos for Parents for Brain Training

Learning about brain training in children is incredibly beneficial for parents. While a child can practice brain training in multiple ways, sometimes it is necessary for a child to have extra guidance to improve their skills. There are many resources available online, and collected below are some of the best videos designed to teach parents and children about brain training. They include videos designed to inform and various activities to help improve brain function in your child. Check out the links below, which are update regularly by our team at South County Child and Family Consultants.
