

Resources for Parents on Learning Disabilities

Across the Internet there is an abundance of information available about learning disabilities. Learning disabilities affect the brain's ability to receive, process, analyze, and store information. There are many strategies that children can use to make learning easier. Included in the following links are interesting and well written articles by parents across the field, in addition to resources collected from social media platforms such as Pinterest. Check out the following list of resources for parents to learn about learning disabilities, updated regularly by our team at South County Child and Family Consultants.
