

Videos on Planning for Parents and Kids

The internet holds a vast wealth of ever-expanding information. Essentially, anyone can teach themselves anything using only a laptop computer. For some people learning through reading is the most efficient way to

learn, but educational videos can be a better resource for some people to learn. We at South County Child and Family Consultants have found a great selection of videos, for all ages, to learn about planning skills. Check out the links below, which are updated regularly by our team.

For Adults

[Planning and executive functions for kids](#)

A video by Bonnie Terry that teaches parents about planning skills and how your executive function contributes to your planning skills. This video is great for parents.

[Planning a day](#)

Hear first hand why planning your day can ease stress and help you be more efficient. More directed to parents, but the same skills can be helpful for teens.

[Planning Skills and Video Games!](#)

Learn how to develop important planning skills with the help of video games! A great way for parents to learn how videogames can be helpful.

For Kids

[What Is Planning?](#)

A short informational video for kids explaining what planning is using relevant examples.

[101 Ideas for Minecraft Learners – Four – Lets make a Maze](#)

This video provides instructions on how to make a maze in Minecraft and can help with planning skills! For kids, tweens, and teens.

[101 Ideas for Minecraft Learners – Seven – Design & Build a Farm game](#)

This video provides instructions on how to design a farm game. This can help with developing planning and organizational skills. For tweens and teens.

[101 Ideas for Minecraft Learners – Eight – Route planning in Minecraft GB](#)

A video that teaches kids how to use a map by implementing maps into Minecraft! Great for tweens and teens.

[Plan, Practice, Improvise – Understanding the Three Types of Play in Games](#)

This video talks about games and how they can relate to your planning, flexibility, and focus skills! For tweens and teens.

[Puzzle Games](#)

A video that talks about the usefulness of puzzle games that can be related to skills such as math, planning, flexibility, focus and time management. For tweens and teens.

[Planning and Organization Crash Course.](#)

One video from the well-known “crash course series” that is short and sweet. Directed towards kids and teens who need help learning planning skills.
