

Resources on Anxiety for Parents

A significant number of parents are likely wondering if their child has anxiety as it becomes a more common occurrence in society today. We have provided a list of resources including articles, pdfs, apps, and Pinterest boards. In order

to understand the best ways to help a child, parents need to understand anxiety in the first place. These different resources dive into signs and symptoms, discuss treatment options, and provide tips to help your child. Everyone has different experiences with anxiety so it is important to remember that some resources may be more helpful than others.

Our team of neuropsychologists, school psychologists, and psychology students at South County Child and Family Consultants are committed to searching the Internet and beyond to find reputable, informative, and practical tools to help parents, children, and teens understand and improve their anxiety. We look for the best information online to help kids diagnosed with ADHD, Learning Disabilities, Executive Functioning Difficulties, struggles with Social Emotional Learning (SEL) skills, Autism, Depression, and Anxiety and provide you with information about how neuropsychological evaluations help in targeting concerns regarding anxiety. Come back regularly, as the links are updated frequently.
