

# Model Test Report

Here is a sample of a full neuropsychological evaluation conducted at South County Child and Family Consultants. In addition to the comprehensive nature of our reports, they are provided in electronic format that lets readers click on a set of links to learn about how to interpret test data, understand the domains that are being evaluated, and identify the specific tests that are administered. In addition, many of the recommendations provide links to videos, websites, and online resources designed to help families derive the greatest benefit from the evaluation.
